Implementing SAFe

Achieving Business Agility with the Scaled Agile Framework,

with Certified SAFe® Program Consultant

During this four-day course, attendees learn how to lead a Lean-Agile transformation by leveraging the practices and principles of the Scaled Agile Framework® (SAFe®) and the seven core competencies of the Lean Enterprise. Attendees gain insights and practice how to coach programs, launch Agile Release Trains, build a Continuous Delivery Pipeline with DevOps culture, and empower a Lean Portfolio.

About this course

The first two days of the course — Leading SAFe® — provide the basis to teach SAFe to leaders. The final two days focus exclusively on what it takes to implement SAFe in the enterprise successfully. Certifying as a SAFe® Program Consultant (SPC), and becoming a change agent, enables attendees to coach and

www.agiletechdevelopment.net

guide the enterprise to succeed in a disruptive marketplace and empower them to implement a Lean-Agile SAFe transformation.

Through our **training concept**, the participants will be involved in a learning process that creates insight and lasting knowledge. The training has been designed to include theory, practical exercise, dialogue, and reflection.

Who will benefit?

- Professional services consultants

- Internal change agents, Lean-Agile Center for Excellence (LACE) participants, Agile Working Groups

- Business and technology executives, leaders, managers, and directors

- Portfolio managers and fiduciaries, Project/Program Management Office (PMO) personnel

- Development, QA, and IT managers

- Program and project managers

- Product and product line managers

- Process leads and lifecycle governance personnel

- Enterprise, System, and Solution Architects

Prerequisites

All stakeholders in a Lean-Agile transformation are welcome to attend the course, regardless of experience. However, the following prerequisites are highly recommended for those who intend to take the SAFe® Program Consultant certification exam and practice as a SAFe® Program Consultant (SPC):

- More than five years of experience in software development, testing, business analysis, product or project management
- More than three years of experience in Agile
- One or more relevant Agile certifications

What you will learn

- To perform the role of a SAFe® Program Consultant (SPC), you should be able to:
- Lead a Lean-Agile enterprise transformation
- Implement SAFe
- Implement Lean Portfolio Management
- Perform Value Stream identification
- Launch and coach Agile Release Trains
- Coordinate multiple Agile Release Trains with a Solution Train
- Use the seven core competencies to achieve business agility
- Train managers and executives in Leading SAFe®
- Continue your learning journey and become enabled to train other roles in a SAFe Enterprise

www.agiletechdevelopment.net
