## The Effective SCRUM MASTER with Professional Scrum Master certification PSM1

### How to build a fantastic team

Today, the Scrum Master is an established role within any organization involved in IT development, and most managers know that a skilled and effective Scrum Master is key to building a fantastic team. The Scrum framework is an enabler in any business and the Scrum Master responsibility is a change agent for an entire organization. For individuals, the role has become an attractive career path with a wide range of opportunities.

### About this course

In this two-day course, attendees will gain practical knowledge of critical components in team facilitation and how to manage the Scrum events. You will discover the basics of building a high performing Agile team that delivers the maximum business value. In addition to the fundamentals of team-level work, the Scrum Master role in the context of a whole enterprise will

be embedded as a natural constraint. If you choose to attend an online edition of the course, you will experience different digital tools you can use for remote work within your team.

Through the concept “[Training from the back of the room](#),” the participants will be involved in a learning process that creates insight and lasting knowledge. All course modules have been designed to include theory, practical exercise, dialogue, and reflection in accordance with our [training concept](#).

Training material is in English, but depending on preference, we will speak either Swedish or English in the classroom.

## Target Audience

The following individuals will benefit from this course:

- Future or emerging Scrum Masters who need to perform the role
- Team members who want to be part of building a fantastic team
- Experienced Scrum Masters who would like to repeat and understand their role in a broader context
- Lean-Agile Leaders who wish to understand the Scrum Master role
- Chief Scrum Masters who want to collaborate with Scrum Masters in a “team of teams” setup

## Prerequisites

You do not need any special prior knowledge, but an interest in teamwork is genuinely beneficial. Come prepared by downloading and reading the Scrum guide at [scrumguides.org](http://scrumguides.org), and feel free to test your knowledge in the Open assessments at [Scrum.org](http://Scrum.org).

## Learning goals

After this course you should be comfortable in what the Scrum Master role means and will be able to:

- Describe Scrum from both a how and why perspective
- Facilitate effective Scrum events
- Support relentless improvement
- Coach an Agile team for maximum business results
- Support DevOps implementation
- Pass the assessment to become a Professional Scrum Master I

## Topics covered

- The basics of Scrum (purpose, values, roles, events, and artifacts)
- Characterizing the role of the Scrum Master
- Product backlog management (slicing, documentation and estimation)
- Tools and practices for Sprint execution
- Coaching the Agile team
- Servant Leadership

## Certification

After completing the course, you will be able to become a Professional Scrum Master level 1 (PSM I) at Scrum.org. The course price includes one attempt to get certified. After completing the training, you will receive a code for accessing the web-based assessment.

An acquired certificate will support your ability to act as an ambassador for Scrum in your organization.
